

WET RIDE™

A Heavy Bodied Synthetic Lubricant

Wet Ride™ excels over long distances and in the most extreme weather.

Wet Ride is a thicker, heavier bodied lubricant that is totally waterproof. Wet Ride is made using only premium synthetic oils and water repelling polymers. The result is a lubricant with unmatched film strength.

4 oz and 8 oz
Squeeze Bottles,
32 oz Shop Size Jug

Wet Ride lasts and lasts, through the longest of rides and the ugliest of weather conditions. Special anti-corrosion additives prevent rusting of parts even when subjected to snow or sleet, heavy fog or coastal salt-air.

Because Wet Ride is so durable, it's a popular choice for off-road cyclists who are faced with muddy conditions. Wet Ride is heavy enough and waterproof enough to easily counteract the effects of mud and crud on the chain.

In dry conditions, Wet Ride is especially

popular with road cyclists seeking optimum performance over ultra long distances.

Wet Ride eliminates drivetrain noise, it delivers super smooth shifts, unmatched lubrication intervals, and total protection against water.

Since then White Lightning products have grown to become recognized globally, as the brand that means 'clean riding'. From Clean Ride to Epic Ride to Wet Ride - all White Lightning lubricants perform better and stay cleaner that those of the competition.

WASH & SHINE™

Cleaning Your Bike is Easy!

Wash & Shine™ quickly loosens, lifts and removes dirt, grime, mud and dust from your bike.

Wash & Shine is great as a 'maintenance cleaner' - simply spray onto the entire bike after the occasional dirty ride or as needed. Let soak in for just a couple of minutes and then rag wipe or rinse off with a hose.

Wash & Shine is an advanced 100% biodegradable solvent-free formulation. Because Wash & Shine is safe for all parts of your bike you can use it regularly to keep your bike looking like new. And the carnauba wax in this amazing product leaves a protective film and an eye pleasing shine!

At White Lightning we are frequently asked, "Can we use Wash and Shine on other stuff?" The answer is a resounding yes! Wash & Shine is being used to clean-up dirt bikes, ATV's, snowmobiles, boats, lawn & garden equipment, camping gear, and even kitchen appliances and counter tops!

In 2000, Paul sold White Lightning to Hank Krause, who had been innovating and developing performance enhanced bicycle lubricants since the mid 1980's. Hank and his team took over, and with continued collaboration from Paul, the result has been a steady stream of innovative new products and product improvements.
